

Who do you share your birthday with?

360,000 births happen each day around the world, which means we share our birthday with approximately 360,000 other people! Today's activity is all about learning who we share our special day with.

Important events also happen every day across the globe. Why not also spend some time finding out what historical moments, cultural changes and sporting achievements happened on your birthday?

Use the boxes below to record what you find out using words and/or pictures.
